

PURUSHOTHAM VILASAGARAM

Software Engineer in Test (SDET) | Automation & Quality Engineering

Hyderabad, Telangana, India | +91 9703201491 | purushothamvilasagaram95@gmail.com | [linkedin.com/in/purushothamv](https://www.linkedin.com/in/purushothamv)

SUMMARY

Automation QA Engineer with 3.5+ years building scalable test frameworks across enterprise data governance and industrial SCADA/HMI/MES platforms, using Selenium, Playwright (TypeScript), and REST Assured. Reduced manual regression effort by 60% through automation and has a track record of root-causing defects that engineering teams couldn't isolate manually. Comfortable across the full SDLC: requirements analysis, test design, automation, defect triage, and release readiness in Agile teams.

KEY ACHIEVEMENTS

- ▶ **Cut regression testing time by 60%** by automating high-frequency manual test cases, freeing the team for deeper exploratory testing each release.
- ▶ **Root-caused a critical logout defect** that manual testing had missed, by replicating user behavior in automation and tracing the underlying API calls to the source.
- ▶ **Carried full ownership of my test areas through two acquisitions** (Albanero → Infor, GE Vernova → Velotic) — same product, same responsibilities, no handoff gaps.

TECHNICAL SKILLS

Languages & Testing: Java, TypeScript, JavaScript, Playwright, Selenium WebDriver, TestNG, JUnit, Cucumber (BDD)

API & Performance: REST Assured, Postman, JSON, JMeter, Chrome DevTools Protocol (CDP)

CI/CD & Infra: Jenkins, GitLab CI/CD, Docker, Maven, Git

Process & Tooling: JIRA, Confluence, SQL, Agile/Scrum, Data Governance, Data Mesh, Metadata Testing

EXPERIENCE

Quality Assurance Engineer

Aug 2025 – Present

Velotic Software (Proficy product line; formerly GE Vernova, acquired by TPG, Mar 2026)

- ▶ **Took full ownership of testing for my assigned features** within the Proficy SCADA/HMI/MES suite — deciding what to test, writing and running the tests, and confirming each was ready for release.
- ▶ **Wrote and maintained Playwright + TypeScript automation** for industrial UI workflows, running suites on RDP-based VMs that mirror real plant-floor deployment environments.
- ▶ **Ran manual exploratory passes on newer or higher-risk features**, then converted stable flows into scripted regression coverage once the UI settled.
- ▶ **Worked directly with developers on bug fixes pre-release**, and kept full ownership of my test areas through the GE Vernova → Velotic Software acquisition with zero handoff gap.
- ▶ **Documented test coverage and defects in JIRA and Confluence**, giving leads clear visibility into feature readiness ahead of each release cycle.

Quality Assurance Analyst, Associate (prev. Software Test Engineer I)

Jan 2023 – Aug 2025

Infor India Pvt. Ltd. (joined via Albanero Dev Pvt. Ltd., acquired by Infor)

- ▶ **Built the team's test automation framework from scratch** in Java + Selenium WebDriver + TestNG, supporting reliable cross-platform and multi-instance test execution.
- ▶ **Reduced manual regression time by 60%** by converting high-frequency manual test cases into automated suites, then integrating them into CI/CD (Jenkins + GitLab) as the team scaled under Infor.
- ▶ **Caught a critical logout defect** by replicating user behavior through Selenium-Java scripts and capturing the underlying API calls, enabling developers to root-cause and fix it.
- ▶ **Used Chrome DevTools Protocol (CDP) and Postman** to inspect network traffic and validate API responses, surfacing backend defects invisible to UI-only testing.
- ▶ **Expanded into data governance testing** as the role grew — designing test cases for business-rule validation, data glossary, catalog, and lifecycle policies against Agile/SDLC requirements.
- ▶ **Owned the defect lifecycle in JIRA** from identification through root-cause triage, partnering with developers and data stewards.
- ▶ **Reviewed peers' test cases and documentation** to keep the team aligned on quality standards, and supported test estimation (Pre-L0/L0/L1) for cross-functional planning.

EDUCATION

B.Tech, Civil Engineering — JNTUH

2017 – 2020

Diploma in Civil Engineering — SBTET

2014 – 2017

CERTIFICATIONS

Selenium with Java (Udemy) • Selenium 101 (LambdaTest) • REST API Test Automation (Udemy) • JMeter (Udemy) • Penetration Testing (HackersUnskool)
